Return to CIA Library

A railroad viaduct is located near Hranice (P 50/0 25) (Maehrisch Weisskirchen) on the double-track Ostrova (Maehrisch Ostrau) - Prerov trunk line. The viaduct is a stone structure about 1,000 meters long, 30 meters high, and 8 meters wide. It has two tracks.

Comment:

This viaduct is a major air target because its destruction would effectively interrupt rail operations on this important N-S route. Its height would make the reconstruction a long and difficult job.

1 Annex: Sketch of Railroad Viaduct near Hranice.
